Summary

Dr. Denis-Robichaud is a professor of veterinary livestock management at the Faculté de médecine vétérinaire of the Université de Montréal. She is a trained veterinarian and veterinary epidemiologist, and a specialist of veterinary preventive medicine ([ACVPM](#)). Through her research and teaching, she aims to explore the intersection of technological, societal, environmental and climatic issues surrounding dairy production in order to support its sustainability and resilience. Building on epidemiological foundations, she is developing knowledge and tools related to technological innovations, management practices, and interdisciplinary collaborations to optimize the health of animals, producers, consumers and the environment.

Core Qualifications

- Veterinary preventive medicine
- Animal health
- Epidemiology
- One Health
- Methodology and biostatistics
- Public health

Education

2021 to now	Diplomate of the American College of Veterinary Preventive Medicine
2013 to 2017	Doctor of Philosophy (Ph.D.), Population Medicine University of Guelph, Canada
2011 to 2013	Master of Science (M.Sc.), Veterinary Sciences Université de Montréal, Canada
2006 to 2011	Doctor of veterinary medicine (DVM) Université de Montréal, Canada

Work Experience

2025 to now	Assistant professor Université de Montréal - Leading and contributing to research projects - Teaching first- and second-year veterinary students
-------------	--

2017 to now

Consultant in epidemiology and preventive veterinary medicine

Independent researcher

- Developing, analyzing, interpreting, and publishing research in collaboration with key stakeholders in animal science, public health, and One Health
- Designing and producing online courses for the continuing education of veterinarians and animal scientists
- Understanding and communicating emerging challenges and developments in the dairy industry to both professionals and the general public

2020 to 2024

Postdoctoral research fellowship (part-time)

University of British Columbia

Project: *Integrating genomic approaches to improve dairy cattle resilience*

Supervisor: Dr. Ronaldo Cerri

2021 to 2022

Research advisor (part-time)

Université de Montréal

Project: *Improving Early Warning of Emerging Threats*

Supervisors: Dr. Hélène Carabin and Dr. Christina Zarowski

2011 to 2013

Veterinary clinician (part-time)

Université de Montréal, bovine field services clinic

Supervisor: Dr. Luc DesCôteaux
